SUMMARY

Computer Science undergraduate with a strong engineering mindset and with hands-on experience architecting and shipping production-grade, AI-powered web applications - from system design and REST API development to deployment. Adopts a project-oriented and curiosity-driven learning approach. Proficiency in AI-assisted development workflows to build and ship faster without cutting corners on code quality. A person with developer's mindset and an explorer's curiosity.

INTERNSHIP EXPERIENCE

Full Stack Developer — PetOLife Pvt. Ltd. **Jun 2026 – Present**

- Architecting and building AI-powered features, including document extraction and AI insights, for a production app
- Designing and implementing functional workflows across the application, contributing to system design, backend development, API integration, and deployment.
- Configured Docker containers and AWS cloud infrastructure (EC2, S3, ALB), establishing CI/CD automation.

Software Development Intern — Bharat Electronics Ltd. **Jun 2025 - Jul 2025**

- Built and deployed a production-ready Predictive Maintenance System integrating real-time ML models with a dynamic frontend (Flask, HTML/CSS/JS, Jinja2).
- Developed structured REST API endpoints serving live ML-based failure predictions to the frontend.
- Worked across the complete pipeline - data preprocessing, model integration, visualization

EDUCATION AND ACHIEVEMENTS

Presidency University | B.Tech, CSE (Data Science) | CGPA: 8.4 **2023 – Present**

- Class Representative for 7 semesters.
- Organized IEEE Tech Week '25; received a Certificate of Appreciation for leadership and event management impact
- Secured Rank 1 (Internal Round) — Smart India Hackathon '25.

MES PU College | PUC, Computer Science with Math and Physics | 92% **2021-2023**

- Class Representative for 2 years; graduated with 92% results.
- Winner — Personality Contest, Debate, and Dance Competition.

PROJECTS

Insider Navs — Self-Initiated Indoor Navigation System [React , PostgreSQL , DuckDB-WASM , FastAPI]

- Designed a hybrid data architecture with caching for efficient in-browser analytical queries and real-time data access
- Built a custom OpenStreetMap (OSM) data-extraction pipeline to process spatial data for indoor navigation and routing

RazorRecover — Autonomous Revenue Recovery & Payment Engine [Python, React 19, SciPy, Gemini API]

- Built an autonomous revenue recovery engine featuring a dual-mode LLM agent with deterministic pattern matching and self-calibrating feedback loops, integrating Razorpay webhooks with idempotency-backed automated capture pipelines .

SKILLS AND TOOLS

Languages & Core: Python, JavaScript, SQL, Bash / Shell scripting, OOP, Graph Algorithms
Backend - APIs & DB: FastAPI, REST API Design, PostgreSQL, DB Architecture, Caching & Load Balancing
DevOps & Deployment: Git/GitHub, CI/CD, Docker, AWS (Cloud Formation,EC2,S3,ASG,ALB), Vercel
AI-Assisted Development: ML models and AI web integrations, Prompt Engineering, AI Pair-Programming
Other: System Design, Linux ,UI/UX Fundamentals, Cybersecurity Fundamentals,Team Leadership, Technical Presentations

ADDITIONAL INFORMATION

- **Interests:** Open source and community learnings , Desktop customizations , Cybersecurity concepts
- **Languages:** English, Hindi , Kannada , Telugu.
- **Activities**: Technical Mentorship , Presentations , Time managements , Public speaking.
